Responsible AI Checklist

A final review for accuracy, privacy, fairness, attribution, and policy.

HOW TO USE IT	Write directly on a printed copy or duplicate the prompts into your own notes. Synthetic examples are used. Do not paste confidential school, workplace, or personal data into AI tools.

1. Before use

Check whether AI is appropriate for the task.

- ■ I understand the rules that apply in my school, workplace, or project.
- ■ I have removed personal, confidential, and sensitive data.
- ■ I can explain why AI is being used.
- ■ I will not present generated work as evidence of an event or achievement.
- ■ A human remains accountable for the final decision.

2. During use

Keep records that make review possible.

- ■ I can distinguish my input, source material, and generated output.
- ■ I have challenged assumptions and stereotypes.
- ■ I have asked for uncertainty, not artificial confidence.
- ■ I have not relied on invented citations or unverifiable claims.
- ■ I have paused if the task affects safety, rights, or high-stakes decisions.

3. Before delivery

Treat output as a draft until verified.

- ■ Important claims are checked against reliable sources.
- ■ Attribution and copyright requirements are satisfied.
- ■ The final work is understandable without the AI conversation.
- ■ I can explain edits, limitations, and decisions.
- ■ The output helps the intended person without exposing anyone else.

This resource supports learning and reflection. It is not legal, medical, financial, or professional advice. Verify important decisions with an appropriate qualified person.
